

July, 2007

These are photos of my roof before and after intensive spraying with **ROTban**. For some reason I had a huge growth of moss – much more than anyone else in the neighbourhood. After treatment with ROTban, we are happy to see that our roof is now the healthiest by far.

As a Property Manager for Houghton Realty, I have **recommended ROTban** treatment for several roofs, and have seen good results there, too.
